Short Run Digital POP & Display Solutions

Corrugated Packaging & Display Printing

As a market leading manufacturer of large format, high resolutions short-run displays, point of sale materials and packaging, Digital Impact offers economical digital printing, die cutting and converting for run lengths from one to 5,000+ pieces.

We design and manufacture custom temporary, semi-permanent and permanent POP displays packaging and signage for some of the world's top brands.

We combine technical expertise with decades of experience and dedicated customer support to give you the means to capitalize on new marketing opportunities. Utilizing state-of-the-art digital printing echnology, we completely eliminate the need for films, plates, and cutting dies, saving you valuable time and money.

Lightfast

Premium Quality

High gloss

Odorless

Flexible

Durst RHO 900

With our Durst Rho 900 UV based ink printer, we are able to print on almost any substrate. This enables projects to utilize multiple substrates with the same color output. The Unit can print sheet as well as Roll to Roll Material for a broad range of applications.

- 98" width
- 600 dpi high resolution
- Roll to Roll and Sheet Capability
- Semi Automated Loading Printing
- Print on just about ant material

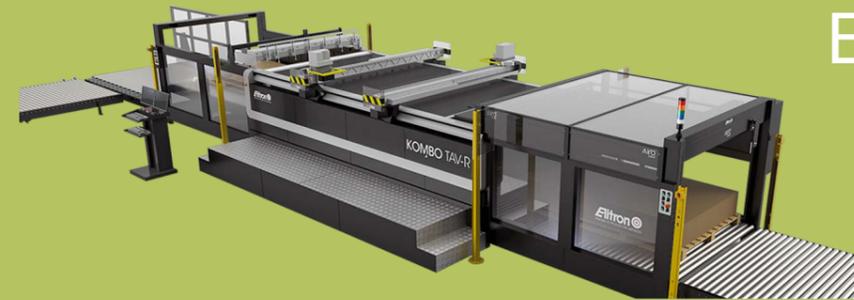

Durst Delta WT 250

Our press is the first unit installed outside of Europe for this Corrugated Printer class with enhanced drying system. This technology offers high-end digital printing with water-based, non-hazardous inks as an alternative to UV and solvent based ink systems. The water based ink enables premium quality, odorless, abrasion resistant, light fast glossy digitally printed pieces to be produced. This ink set complies with the most stringent health and safety regulations.

- Print Resolution Of 1000 dpi
- Printing in 6 colors - CMYK, Lc, Lm
- (WT) inks comply with the strictest health and safety regulations
- Superb litho quality, odorless, abraision- resistant, glossy print reproduction on

STATE OF THE ART EQUIPMENT

Elitron Kombo Tav-R

To continue our investment in advanced cutting technology, we are currently using 2 Elitron Kombo TAV-R Die Cutters. These are the only plotters with two independent cutting heads able to cut at speeds of up to 102 mt/min. The Kombo TAV-R flexible dieless finishing system cuts production times and reduces costs whilst offering maximum versatility for both short and complex production runs. This further automates our entire production process, reduces costs, and delivers a non-stop workflow.

Kombo TAV-R represents the cutting department state of the art. In the most complete version, full automation results in an elaborate motorized materials handling system, exclusively developed by Elitron.

Esko Kongsberg XP DCM Die Cutter

Digital Impact utilizes Esko Kongsberg Cutting tables.

- All of the tables have automatic load and unload from the table providing a fast through put of material for scoring and cutting. A camera system allows for accurate print to cut registration saving time and bringing down production costs. This method allows for jobs to be put through without any tooling costs as no physical dies are required for any job. The XP Auto has routing capabilities so that it can handle rigid materials such as acrylic, Styrene, Di-Bond, Wood and thicker materials.

Digital Impact Materials List

Corrugated Board

- Kemi / Mottled White – E, B and C Flutes
- Kemi / Kemi – B Flute
- Mottled White / Kraft – B and C Flute
- Kraft / Kraft – E, B, C and BC Flute

Additional Materials available for special order.

Rigid Substrates – Thickness From 1/32” to 1 9/16”

- Fome-Cor
- Coroplast
- Foam PVC
- High Impact Polystyrene
- High Density Polystyrene
- SBS – 18pt, 24pt and 48pt
- Chipboard – 16pt
- Acrylic / PET / Polycarbonate
- Bio-Board / Falcon Board
- Dibond
- Gatorfoam
- Wood Sheets

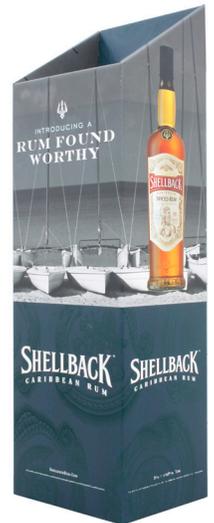

Additional Materials available for special order.

Flexible Substrates

Many Suppliers to choose from – Avery, 3M, 3A Composites, Brett Martin, Catalina Graphic Films, Fiber Mark, PALRAM, Verseidag US, United Industries, Ultraflex Systems, Mactac, Quality, and many others.

Vinyl (White, Clear), SBS, Styrene, Backlit, Poster, Wallpaper, Wall Cling, Window Cling, Magnetic, Floor Graphics, etc.
